What does Leucillin do?
It kills germs instantly by destroying the bacteria on contact. No surviving bacteria means no resistance to skin recovery, demonstrating rapidly reduced recovery time.

Leucillin, What is it?
Leucillin mimics the body’s own immune system by containing the active ingredient Hypochlorous (HOCl); this is a naturally occurring chemical in the mammalian body produced by white blood cells to fight infection caused by invading pathogens.

Hypochlorous is one of the most effective and efficient biocides known to man. Whilst being totally safe, it is many 100 times more effective than other sanitizers and is almost instant in its effect and unlike antibiotics; bacteria do not develop immunity to it.

How do I use Leucillin?
Leucillin is skin pH neutral, non-toxic, and will not sting. It is 100% safe to use in any application including eyes, ears, sensitive and allergy prone skin, simply spray liberally to use, allow to dry naturally.

For ongoing conditions spray affected area liberally three times per day until symptoms are no longer present.

Effective Infection Control
Skin is the body’s largest organ and acts as its first and largest line of defense against harmful pathogens (bacterial, viral and fungal), protecting and maintaining the skin’s health is vital to the overall well being to you and your pet.

Specially formulated for the health and skincare of your pet, Leucillin is a revolutionary anti-bacterial, anti-viral and anti-fungal spray. Suitable for use on all mammals, birds and reptiles Leucillin is an innovative, reliable and affordable infection control solution to treat a wide variety of skincare conditions.

Leucillin out-performs other products with its ability to kill up to 99.99999% of germs that can cause infection; irritation, dry, itchy, flaky or smelly skin problems that so often plague our pets. Leucillin provides you with a powerful solution to combat all types of infection.

Antiseptic Skin Care
Leucillin; usages and capabilities

- Wound treatment for all mammalian animals, birds and reptiles
- Mirrors the body’s immune system
- Kills all bacteria, viruses, fungi and microbial spores.
- Non-toxic, skin pH neutral, 100% safe
- Safe around eye, mouth, sensitive and allergy prone skin
- Eliminates infection
  - Does not sting or irritate
  - Decreases chronic inflammation
  - Reduces healing time by up to 80%
  - Non antibiotic or steroidal
  - Competition Safe under FEI and JC rules
  - No rinsing required

Allergies and Itchy Skin
Leucillin replicates the body’s own immune system making it 100% safe to use on all skin types, even the most sensitive skin will not have any adverse reactions to Leucillin.

To alleviate the symptoms of allergy sufferers, liberally spray the affected areas to control the external conditions, refer to your veterinarian to address the allergy cause if not immediately apparent. For all dermatological conditions including hot spots, atopic dermatitis and acral lick granulomas, liberally spray the affected areas when conditions flare up, repeat treatment three times daily.

Cuts and Inflammation
I used the Leucillin on a small cut behind my horse’s ear - it had broken the skin and was slightly swollen but nothing very severe. I have to say the following day the cut had scabbed over really well and the small swelling had gone down, so I was very pleased and will definitely be using Leucillin again.

Dog, Skin Condition
My bulldog suffers from a skin condition, we don’t quite know what it is, we have tried many creams, sprays and shampoos from the vet. Nothing seemed to fully clear it up. We then found Leucillin, we have been using it now for 3-4 weeks and the result is amazing, the patches on his skin have dried up and the fur is starting to grow back.

Emma Linley

Horse & Cat, allergy & open wound
I have used Leucillin on both my horse and my cat with very pleasing results. My horse had some very bad fly bites which caused an allergic reaction. Leucillin seemed to calm the itch and helped the rubbed areas to heal quickly. My cat was in a fight and received a minor bite, which I regularly bathed with Leucillin (he allowed me to, unusually). The wound healed cleanly with no infection and the hair grew back quickly.

Lyn Shew

Cuts and Grazes
See Wound Washing. For all symptoms of broken skin including post surgical sites liberally spray in and around the surface of the wound with Leucillin. If the wound requires a dressing spray a clean gauze and apply it securely to the wound to keep the area moist and sterile during the healing process.

How do I use Leucillin?
Leucillin is skin pH neutral, non-toxic, and will not sting. It is 100% safe to use in any application including eyes, ears, sensitive and allergy prone skin, simply spray liberally to use, allow to dry naturally.

For ongoing conditions spray affected area liberally three times per day until symptoms are no longer present.
How Effective is Leucillin?

Leucillin is a Log 7 reduction that's 99.99999% Effective

Log Reduction stands for a 10-fold (one decimal) or 90% reduction in numbers of live bacteria. For example a wound containing 1 million bacteria after an application of Leucillin none would survive, using a Log 3, 99.9% effective, out of your 1 million bacteria 10,000 will be left alive to continue to grow, multiply and potentially can develop a resistance rendering the product ineffective.

What makes Leucillin the best? ... Its high strength formula

Due to the speed in which surviving bacterial cells can reproduce, a 99.9% kill rate is not sufficient to prevent re-infection and resistance. Leucillin contains an extra strength formula which kills 99.99999%, to ensure that not a single pathogen cell survives.

Minor Skin Trauma

In conditions where the skin is irritated, inflamed or broken Leucillin alleviates and soothes. In mimicking the bodies immune system, Leucillin has the effect of calming the autoimmune response thus reducing inflammation caused by minor trauma to the skin.

Working in harmony with the bodies own defense mechanism, Leucillin enables the body to focus its renewal energies on recovery rather than pathogen defense, thus demonstrating rapidly reduced recovery times.

Trade and General Usage

Having been involved with horses all my life and managed an Equestrian Retailing outlet for the past 25 years I have come across many products and can honestly say that I have never had anything quite like Leucillin before. It is totally amazing and so universal, it heals everything! My ex racehorse had a nasty rope burn and within 24 hours the wound looked totally different, my niece’s dog had a sore eye and even if it did she stated it would take many many weeks however I was so impressed with the way it was healing I decided to stick with the Leucillin along with antibiotics, less than three weeks after I started using Leucillin the wound was totally healed and only a tiny hairline mark remained, I was totally amazed. I have now recommended it to my fellow dog show exhibitors and mushers. I only wish I’d know about it sooner.

Wound Washing

Leucillin should be sprayed liberally directly in to the wound, if the wound requires covering Leucillin can sprayed onto gauze pads and then applied directly to the wound to retain a clean, sterile environment. Leucillin does not sting or irritate, the action of spraying liberally will clean and flush the wound. Leucillin’s powerful antibacterial capabilities will kill any infection, this will aid the body’s own ability to heal itself and demonstrate rapid healing.

Hold the spray bottle approximately 2 inches from the wound bed, Aim the nozzle at the wound and squeeze the trigger, directing the stream of cleanser along the base and sides of the wound, if necessary blot up excess moisture with a clean gauze pad, but do not rinse or dry, allow Leucillin to dry naturally.

Eye Infections

Leucillin mirrors the body’s own defence mechanism, in doing so it is non-toxic, skin pH neutral and will not harm healthy tissue, it is 100% safe to use on all skin types including sensitive or allergy prone skin, eye and outer ear infection.

For applications to eyes, apply Leucillin directly into the inner corner of the eye, for ease of application and precision use the stream of cleanser along the base and sides of the wound, if necessary blot up excess moisture with a clean gauze pad, but do not rinse or dry, allow Leucillin to dry naturally.

Infection caused when elderly pony with cataracts punctured eyeball rubbing against a tree. The socket was bathed twice daily with Leucillin and wipe clean the area around the eye as well. Repeat treatment three times daily until symptoms are no longer present.

Lucinda Green MBE

Professional Equine Management

“What I have found magic about Leucillin is that whenever you are not quite sure what to do or put on, I just give a squirt of Leucillin – if it’s a weepy eye, a smelly foot, a cut, a graze, a bite or some odd skin infection, they all have the same treatment - it cleans and then it heals. I find it so useful that I even carry a small, bottle in my handbag for me …”

Lucinda Green MBE

Alaskan Malamute Head Injury,

Leucillin as Wound Wash & Treatment

I have ten Alaskan Malamutes which I successfully work and show. I first tried Leucillin a few weeks back, whilst on holiday in Scotland my top show dog got an injury on her head, it was a deep wound and I was very worried about infection. A friend gave me a little bit of her Leucillin, told me not to worry that this stuff was fantastic, I sprayed it on several times a day, the application was a clean and easy and having no odour or sting my dog had no problem with her ‘squirts’! I didn’t even have to worry about it going in her eyes as it was totally safe.

I got back home a few days later and the wound looked better already, however I took her to the vets just to be on the safe side and was advised to get it stitched, the vet doubted it would heal and even if it did she stated it would take many weeks however I was so impressed with the way it was healing I decided to stick with the Leucillin along with antibiotics, less than three weeks after I first used Leucillin the wound was totally healed and only a tiny hair line mark remained, I was totally amazed.
